

Study Title:	Treatment trial for previously treated Non-Hodgkins Lymphoma
Scientific Title:	WON HO10407: A phase II study of Velcade and temsirolimus for relapsed or refractory B-cell non-Hodgkin Lymphoma
Department and/or Specialty:	Oncology – Hematology – Non-Hodgkin Lymphoma
Investigator:	Michael Thompson, MD, PhD
Contact Information:	Chanda Miller 262-928-5539
<p>The investigators want to find out if the drugs Velcade and temsirolimus given together are effective in treating cancer. Velcade and temsirolimus are each FDA approved individually for certain types of cancer (Velcade for multiple myeloma and mantle cell lymphoma, and temsirolimus for renal cell carcinoma) but are not currently approved in combination for B-cell non-Hodgkin lymphoma. The investigators are trying to find out if giving these 2 drugs together will improve the period of time that the patient's cancer is stopped or slowed from growing and causing symptoms.</p>
