

Study Title:	Radiation Therapy in Treating Patients With Extensive Stage Small Cell Lung Cancer
Scientific Title:	RTOG 0937-Phase II Randomized Study of Prophylactic Cranial Irradiation With Versus Without Consolidative Extracranial Radiotherapy in Patients With Extensive Stage Small Cell Lung Cancer
Department and/or Specialty:	Lung-radiation therapy
Investigator:	Wingate Clapper, MD
Contact Information:	Chanda Miller
Purpose: <u>Radiation therapy</u> uses high energy <u>x-rays</u> to kill <u>tumor cells</u> . This may be an effective treatment for <u>extensive stage small cell lung cancer</u> . This <u>randomized phase II trial</u> is comparing how well radiation therapy to the brain works when given with or without radiation therapy to other areas of the body in treating patients with extensive stage small cell lung cancer..
